## **1. Study programme „Fine Arts“**

Degree: Bachelor of Fine Arts

The interdisciplinary Bachelor degree „Fine Arts“ encompasses all of the artistic and scientific subjects taught at this institution. Students can choose from a range of subjects: Sculpture, Stage Design, Design, Film, Photography and Graphic Art, Painting and Drawing, Theory and History of Art and Time-based Media, as well as numerous workshops and laboratory classes. Students are free to decide whether to combine several subjects or to concentrate on a single subject. This open structure guarantees maximum flexibility and allows students to determine the content of their studies in art and/or science themselves.

During their first two semesters, beginning students will receive extensive supervision and assistance in becoming familiar with forms and methods of working, as well as in determining which subjects to take in the following years. Eventually, the learning and research which is undertaken in the studios of this institution will be dictated by the student's own artistic intentions and by the interaction between individual artistic ideas and the practical considerations of planning and artistic work. Students will be assisted extensively during this process by assessment both within the group and in one-to-one conversation with tutors. At the same time the various scientific options on offer will help students to develop their plans for artistic development in detail, give them a theoretical dimension, and set them out in a judicious way and present them successfully to others. It is also possible to concentrate on scientific subjects. Knowledge of the materials and the principles of application of different techniques of working in art, as well as the necessary manual and technical skills can be gained in the numerous different artistic workshops.

Students will learn to develop work of their own which is experimental in a way which emphasises the aesthetic principles behind the work, the statement it makes and its strengths. They will be able to gain skills in craft processes which will enable them to express, refine and further develop a variety of artistic ideas. Students will be able to develop a knowledge of the history of art and theoretical concepts which will enable them to analyse and determine the state of development of their own artistic work and both increase and enhance their artistic productivity. Students taking a scientific subject will also learn to formulate theoretical problems, to develop an argument which traces their implications, and arrive at a conclusion or thesis.

Developing the ability to present one's own work to an audience, and to translate it into a variety of media is also an integral part of this study syllabus.

The normal amount of time needed to complete this degree is 8 semesters.

## 2. Content of study

Information and skills which are a necessary component of study will be transmitted during modules which are divided into three categories: „Orientation/Basics“, „Artistic Development“ and „Scientific Studies“, and are supplemented by accompanying courses.

### Orientation/Basics:

#### *Semester 1 - 2:*

<b>Modules</b>	<b>Department</b>
An introduction to artistic work in Sculpture	Sculpture
An introduction to artistic work in Stage Design	Stage Design
An introduction to artistic work in Design	Design
An introduction to artistic work in Film	Film
An introduction to artistic work in Graphic Art/Photography	Graphic Art/Photography
An introduction to artistic work in Painting/Drawing	Painting/Drawing
An introduction to artistic work in Time-Based Media	Time-based Media

### Artistic Development:

#### *Semester 3 - 8:*

<b>Module</b>	<b>Department</b>
Sculpture	Sculpture
Stage Design	Stage Design
Concept Design	Design
Experimental Design	
Product Design	
Social Design	
Experimental Media	Time-based Media
Mixed Media	
Video	
Digital Graphics	Graphic Art/Photography
Graphic Art	
Photography	
Typography	
Painting/Drawing	Painting/Drawing
Film/ The Moving Image	Film

Scientific Studies (semester 1 - 8):

Module	Department
Aesthetic Theories	Theory and History
Design Theory and History	
Art and Cultural Sciences, Gender Studies	
Art History	
Art Criticism	
Philosophy	

Accompanying courses:

*Foundation courses (semester 1 - 8):*

- Basics of Sculpture
- Basics of Stage Design
- Basics of Design
- Basics of Film
- Basics of Graphic Art/Photography
- Basics of Painting/Drawing
- Basics of Time-Based Media

*Group tutorials (semester 3 - 8):*

- Concept Design
- Digital Graphics
- Experimental Design
- Experimental Media
- Film/The Moving Image
- Graphic Art
- Mixed Media
- Painting/Drawing
- Photography
- Product Design
- Sculpture
- Social Design
- Stage Design
- Typography
- Video

*Practical courses (semester 1 - 8):*

- Audiolab
- CAD/3D
- Camera/Light/Sound
- Ceramics
- Computery
- Digital Editing/Film
- Digital Typography and Graphics
- Digital/Material
- Media Technology and Electronics
- Film Production
- Film Studio
- Final Cut
- Fine Metalwork
- Library
- Metal
- Mixed Media
- Photo Studio
- Photography (analogue)
- Photography (digital)
- Plaster
- Plastic
- Prepress Workshop Digital
- Printing Techniques
- Silkscreen Printing
- Textiles
- Typography Publishing Workshop
- Wood

## 3. Curriculum

Semester	Module area/accompanying courses	Credits
1	1 module "An introduction to artistic work" from Orientation/ Basics	12
	1 module from Scientific studies	8
	1 Accompanying course Basics	4
	1 Accompanying course from Practical courses	4
2	1 module "An introduction to artistic work" from Orientation/ Basics	12
	1 module from Scientific studies	8
	1 Accompanying course Basics	4
	1 Accompanying course from Practical courses	4
	Presentation of work	4
3	1 module from Artistic development project	14
	1 module from Scientific studies	8
	2 Accompanying courses or alternative 1 module from Scientific studies	8
4	1 module from Artistic development project	14
	1 module from Scientific studies	8
	2 Accompanying courses or alternative 1 module from Scientific studies	8
5	1 module from Artistic development project	14
	1 module from Scientific studies	8
	2 Accompanying courses or alternative 1 module from Scientific studies	8
6	1 module from Artistic development project	14
	1 module from Scientific studies	8
	2 Accompanying courses or alternative 1 module from Scientific studies	8
7	1 module from Artistic development project	14
	1 module from Scientific studies	8
	2 Accompanying courses or alternative 1 module from Scientific studies	8
8	1 module from Artistic development project	4
	2 Accompanying courses or alternative 1 module from Scientific studies	8
	Final module (Bachelor's thesis and final artistic project)	18
<b>Scope of the degree course in credits</b>		<b>240</b>

## 4. Departments and Modules

### 4.1 Sculpture

In its broadest sense, sculpture involves the process of aesthetic formation in space and includes practices such as the plastic arts, sculpture, installations, object art, conceptual art and performance. The Bachelor's degree course taught in the Department of Sculpture gives its students the opportunity to establish an independent artistic vision and reflect on and engage with practical and conceptual/theoretical issues of sculpture in the past, present and future.

The artistic categories covered by the course include all fields of sculptural design, from the conception of form to colour and space, including their manifold levels of modulation. Students are also required to engage with contemporary art theoretical discourses and a wide range of historical and contemporary visual and form languages. They investigate spatial and environmental relations, issues of sustainability and learn to situate their own artistic articulations and those of others in the specific socio-cultural context of their development. Learning and research on the degree course is structured by students' completion of an artistic development project, in which they work independently or in groups to develop their individual artistic vision through the interplay of practical and conceptual work. Practical sessions in the HFBK workshops and laboratories enable students to engage intensively with aspects of material and form and to acquire the design techniques requisite to the implementation of their artistic ideas. Working with a range of traditional materials – plaster, ceramics, plastics, wood and metal – they also learn 3D printing, media technology and electronics skills.

The interdisciplinary nature of the degree course provides students with the opportunity to engage with related disciplines, thereby situating their artistic endeavours within this broader methodological framework. The HFBK encourages and enables its students to widen their cultural horizons by spending part of their studies at a partner university abroad. We also provide our students with the opportunity to gather experience in a range of contexts both within and outside the art world. Working in an in-house setting – such as the HFBK annual exhibition and in-house gallery – and at events organized by external partners, students gain experience in the presentation, communication and discussion of artistic works. Supplementary courses taught in the Department of Theory and History enable students to explore a range of issues in art theory, history and method in further depth. Relating this to their own artistic vision and experience, students are able to establish their artistic approach and historical understanding.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Sculpture (also open to students of other departments)
<b>Title of module: An introduction to artistic work in sculpture</b>
This module consists of: individual and group tutorials
<p><b>Content of module:</b> An introduction to creating sculptural art in practice</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Refining one's own artistic ideas</li> <li>- Gaining basic practical artistic skills and experience</li> <li>- Gaining an understanding of a variety of artistic concepts</li> </ul>
Entry requirements/useful and desirable qualifications: passing the entrance exam at the beginning of the module
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 360 hours of which Taught hours: 30 hours Independent study (incl. assessment): 330 hours</p>
Credits: 12
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 1st and 2nd semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Sculpture
<b>Title of module: Sculpture 3rd/4th semester</b>
This course consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Instruction in a variety of sculptural concepts and approaches</li> <li>- Developing and trying out individual ways of expression</li> <li>- Discovering connections between one's own artwork and both historical and contemporary art forms</li> <li>- Gaining a clearer awareness of experimental and innovative approaches to sculpture</li> <li>- Engaging with the contemporary discourse of art</li> <li>- Opportunities to gain experience in dealing with a variety of sculptural techniques</li> <li>- Presentation of one's own work</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Gaining a knowledge of the techniques and methods of sculpture</li> <li>- Gaining an insight into forms of visual representation throughout history, as well as the contemporary discourse of sculpture</li> <li>- Gaining experience of the relationship between concept, technique and result</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
Workload per semester: 420 hours of which Taught hours: 15 hours Independent study (incl. assessment): 405 hours
Credits: 14
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 3rd and 4th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Sculpture
<b>Title of module: Sculpture 5th/6th semester</b>
This course consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Successfully translating ideas for 3 dimensional visual art into reality</li> <li>- Engaging with the technical issues of this artistic medium</li> <li>- Analysing and discussing one's own artistic position</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Mastering the methods and techniques of sculpture</li> <li>- Becoming familiar with forms of visual art throughout history as well as the contemporary discourse of sculpture</li> <li>- Understanding the relationship between concept, technique and end result</li> <li>- Defining one's own artwork in relation to the wider context of contemporary art; Critical analysis of artistic concept and end result</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
Workload per semester: 420 hours of which Taught hours: 15 hours Independent study (incl. assessment): 405 hours
Credits: 14
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 5th and 6th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Sculpture
<b>Title of module: Sculpture 7th semester</b>
This course consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Analysing one's own artistic position with regard to both form and content, and applying techniques and methods of sculpting competently</li> <li>- Critical analysis of the artistic concept via the end result</li> <li>- This module will focus on the students' individual artistic approaches</li> </ul>
<p><b>Learning aims:</b></p> <p>Defining one's own attitude to art and one's own ways of expression through form</p>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 420 hours  of which  Taught hours: 15 hours  Independent study (incl. assessment): 405 hours</p>
Credits: 14
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: 7th semester

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Sculpture
<b>Title of module: Sculpture 8th semester</b>
This course consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Critical analysis of the artistic concept via the end result</li> <li>- Defining one's own position on both sculpture and art in general in relation to historical and contemporary art forms</li> <li>- Preparing for the final presentation</li> </ul>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Gaining the ability to analyse one's own artistic position</li> <li>- Defining one's own means of expression in 3 dimensions by means of sculpture</li> <li>- Presentation of artwork</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 120 hours  of which  Taught hours: 15 hours  Independent study (incl. assessment): 105 hours</p>
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: 8th semester

## 4.2 Stage Design

Bachelor's students in the Department of Stage Design focus on the development of an independent artistic vision. Engaging in historical-critical reflection on a range of theoretical and practical issues relating to the design of theatrical spaces in different cultural contexts both past and present, students of the course learn to relate this focus to contemporary discourses on the development of theatre and issues of sustainable design. In so doing students endeavour to situate their work in the specific context of its development.

Individual and group work and research focuses on the design of stage spaces and spatial installations for scenic design in a theatre, musical theatre, film, television, online and performance context and within independent artistic projects. Students develop their skills by working on their artistic development project and benefit from teacher feedback at all stages from idea to realization, given in individual and group tutorials. Beginning at the concept stage, the realization process moves through the design and modelling stages and culminates in a stage-ready production. The process incorporates experimental working practices in spaces and digital worlds, digital design methods and performance.

Students are provided with training in the handicraft and technical skills requisite to this process including stage drawing, model making and photography, CAD, digital printing, digital image editing and video editing. Workshop sessions afford them the opportunity to practice and refine these skills using a range of materials (such as wood, metal, ceramics, printing, digital/materials, media technology and electronics, camera/lighting/sound). They also develop an analytical understanding of the various approaches to content and form involved in the areas of direction, dramaturgy, costume, lighting, sound and video.

In addition to the opportunity afforded to students to exhibit and communicate their own work at the HFBK annual exhibition and graduation exhibitions, the department maintains a number of cooperation agreements with institutions and independent practitioners in the art scene (such as Theaterakademie Hamburg, Thalia-Theater, Schauspiel Hamburg and Kampnagel) which provide our students with the opportunity to gather experience in the communication and discussion of works of art.

The HFBK also maintains a number of international exchange programmes and project cooperation agreements with various institutions throughout the world, which afford our students the opportunity to refine the insights gained into their chosen discipline by engaging with other cultural contexts. The fundamentally interdisciplinary nature of the degree courses taught at the HFBK enables our students to engage with related disciplines, thereby developing their artistic endeavours within a broader methodological framework.

Supplementary academic training enables students of this course to explore a range of issues in art theory, history and method. Relating this to their own experience, students are able to refine their artistic approach and historical understanding.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Stage Design (also open to students of other departments)
<b>Title of module: An introduction to artistic work in stage design</b>
This module consists of: individual and group tutorials
<p><b>Content of module:</b> Introduction to artistic practice in stage design</p>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Refining one's own artistic ideas</li> <li>- Gaining basic practical artistic skills and experience</li> <li>- Gaining an understanding of a variety of artistic concepts</li> </ul>
Entry requirements/useful and desirable qualifications: passing the entrance exam at the beginning of the module
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 360 hours of which Taught hours: 30 hours Independent study (incl. assessment): 330 hours</p>
Credits: 12
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 1st and 2nd semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)

Department: Stage design
<b>Title of module: Stage design 8th semester</b>
This module consists of: individual tutorial
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Critical analysis of the artistic concept via the finished artwork</li> <li>- Discussing, analysing and presenting one's own artistic position</li> </ul>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Working in a varied and appropriate way with techniques and methods of scenically creating stage spaces</li> <li>- Understanding the relationship between dramaturgy, concept, technique and end result</li> <li>- Defining one's own theatrical position in relation to the context of historical and contemporary staging methods</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 120 hours  of which  Taught hours: 15 hours  Independent study (incl. assessment): 105 hours</p>
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: 8th semester

## 4.3 Design

Designers shape our society; in so doing, they assume responsibility for the future. In view of their vocation, students on the Bachelor's degree course taught in the Department of Design are encouraged to develop and refine their own questions about society, practical life and technological advances, whilst developing a design response to the challenges thereby identified. Seeking to facilitate this process, the Department of Design provides an experimental space in which to study.

The degree course aims to introduce its students to the various tasks of a designer and supports their individual artistic development and voyage of professional self-discovery. The course focuses on the practical questions raised by its students, which culminate in individual or group artistic development project. Working independently to structure their studies, students are supervised by the teachers in the various studios.

Students can also take classes taught in other HFBK departments to ensure that they establish their artistic expression on a broad base. The interdisciplinary theoretical teaching provided at the HFBK combines the presentation of historical knowledge with a range of contemporary issues such as ecological sustainability, cultural diversity and post-colonial strategies. This trains students to reflect on future-proof perspectives on art, design and society.

Students realize their artistic development projects in workshop sessions, where they also develop and refine a range of skills using various materials such as plaster, wood, ceramics, plastics, metal/fine metal, digital/material (3D printing), digital and analogue photography, media technology and electronics.

The HFBK places a particular focus on design in real-life contexts; to this end, the department maintains a number of cooperation agreements with private companies, non-profit organisations and public institutions. This enables our students to work on the conception and realization of both individual and group projects as well as gaining experience in a range of participatory design processes. The HFBK also maintains several international partnerships and project cooperation agreements through which our students are accorded the opportunity to gain experience in different social and cultural contexts.

The focus of the degree course on the presentation, communication and discussion of design approaches is given an outlet in the HFBK annual exhibition, excursions and a range of external workshops. Students are also given the opportunity to experiment with new forms of art and design presentation in the HFBK gallery.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Design (also open to students of other departments)
<b>Title of module: An introduction to artistic work in design</b>
This module consists of: individual and group tutorials
<p><b>Content of module:</b> An introduction to both experimental and project-related work</p> <p><b>Learning aims:</b> Gaining an overview of the subject, and acquiring a method of working both on a given assignment and with artistic freedom. This working method will be divided into stages (analysing the task given, coming up with ideas, representing the design in 2 or 3 dimensions, and final presentation of the design)</p>
Entry requirements/useful and desirable qualifications: passing the entrance examination at the beginning of the module
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 360 hours of which Taught hours: 30 hours Independent study (incl. assessment): 330 hours</p>
Credits: 12
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 1st and 2nd semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Design
<b>Title of module: Concept Design 3rd/4th semester</b>
This course consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Examining different attitudes to design</li> <li>- Instruction in various methods of planning and representation</li> <li>- An introduction to the materials and processes involved</li> <li>- Planning and building models to a prescribed scale</li> <li>- Presentation of artwork</li> </ul>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Gaining a knowledge of techniques and methods used in design and in mediactecture</li> <li>- Developing the ability to formulate one's own ideas and to realise and present them using the appropriate means</li> <li>- Gaining presentation skills</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 420 hours  of which  Taught hours: 15 hours  Independent study (incl. assessment): 405 hours</p>
Credits: 14
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 3rd and 4th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Design
<b>Title of module: Concept Design 5th/6th semester</b>
This course consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Exploring a wide variety of tools for communicating in a space</li> <li>- Planning and building models, making use of animatronic techniques</li> <li>- Presentation of artwork</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Developing an individual approach and competence in planning projects</li> <li>- Using and expanding knowledge about techniques and methods of design</li> <li>- Gaining presentation skills</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
Workload per semester: 420 hours of which Taught hours: 15 hours Independent study (incl. assessment): 405 hours
Credits: 14
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 5th and 6th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Design
<b>Title of module: Concept Design 7th semester</b>
This course consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Planning a design and carrying the plan through all phases of development</li> <li>- Critically analysing and defining one's own artwork in relation to the wider world of art</li> <li>- Presentation of work in front of an informed audience</li> </ul>
<p><b>Learning aims:</b></p> <p>Students will have the opportunity to consolidate and further develop their own individual creative principles and practical means of creating work in the areas of design and of mediarchitecture. In addition, they will also gain competence in presenting their work via the presentation of individual work to an informed audience.</p>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 420 hours of which Taught hours: 15 hours Independent study (incl. assessment): 405 hours</p>
Credits: 14
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: 7th semester

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Design
<b>Title of module: Concept Design 8th semester</b>
This course consists of: individual tutorial
<p><b>Content of module:</b> Handling and representing a project in a professional way, from the planning stage to the finished product</p>
<p><b>Learning aims:</b> Students will be able to position their own creative and conceptual principles as well as practical means of creating work in design and mediatecture. In addition, they will also gain competence in presenting their work via the presentation of individual work to an informed audience.</p>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 120 hours of which Taught hours: 15 hours Independent study (incl. assessment): 105 hours</p>
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: 8th semester

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Design
<b>Title of module: Experimental design 3rd/4th semester</b>
This module consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- An introduction to problem-based design in a real social context</li> <li>- Looking at the design process both practically and theoretically</li> <li>- An introduction to the social and political dimensions of design</li> <li>- Looking at drafting methods and communication methods in design</li> <li>- Developing a concept and implementation strategy for a design project</li> <li>- Project-related design work</li> </ul>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Learning a methodical range of techniques for dealing with the constantly changing demands of design work</li> <li>- Developing the ability to research design problems, to work with them and to conceive, present and implement ways of solving them</li> <li>- Understanding the social and cultural role of design</li> <li>- Independent critical and interdisciplinary design work</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
Workload per semester: 420 hours of which Taught hours: 15 hours Independent study (incl. assessment): 405 hours
Credits: 14
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 3rd and 4th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Design
<b>Title of module: Experimental design 5th/6th semester</b>
This module consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- An introduction to problem-based design in a real social context</li> <li>- Looking at the design process both practically and theoretically</li> <li>- An introduction to the social and political dimensions of design</li> <li>- Looking at drafting methods and communication methods in design</li> <li>- Developing a concept and implementation strategy for a design project</li> <li>- Project-related design work</li> </ul>

## 4.4 Film

The Department of Film at the HFBK stands in the tradition of artistic auteur films, and seeks to train innovative filmmakers to take an independent approach to the development of their craft. In focusing on collaborative and experimental working practices, we encourage our students to take an independent and free-spirited approach to all facets of cinematic communication and interaction.

Working on the basis of a thorough grounding in the technical skills of filmmaking, the degree course maintains an inspiring space in which to test film language conventions, conduct developmental film experiments with a long-term impact and discuss the artistic, economic and political role of film in media realities. Students develop their skills by working on an artistic development project, and benefit from teacher feedback at all stages from idea to realization given in individual and group tutorials.

The degree course provides its students with the opportunity to experiment with analogue and digital film techniques and evaluate the project-appropriate use of existing techniques and approaches also in terms of sustainability. In completing individual and group film projects, they gain a grounding in the development of cinematic concepts and their artistic implementation. Student projects can involve both fictional and non-fictional films, as long as they seek to develop artistic authorship.

Students on the degree course also take seminars in film history and theory. Developing an overview of the development of the medium, they reflect on the changing articulation forms of film, especially in relation to time-related discourses. Workshop sessions enable our students to develop their technical film-making skills and realize their artistic development project. The interdisciplinary nature of the degree course provides students with the opportunity to engage with related disciplines, thereby locating their own artistic endeavours within a broader framework.

The HFBK also maintains a number of international exchange programmes and project cooperation agreements with various institutions throughout the world, which afford our students the opportunity to refine the insights gained into their chosen discipline by engaging with other cultural contexts.

Participation in the HFBK annual and graduate exhibitions and in a range of other contexts – including presentations of their films in the HFBK university cinema and public cinemas, national and international film festivals, television and a range of digital platforms – enables students to gather experience in the communication and presentation of artistic works and introduces them to the institutional and social dynamics of this practice.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Film (also open to students of other departments)
<b>Title of module: An introduction to artistic work in film</b>
This module consists of: individual and group tutorials
<p><b>Content of module:</b>  Analysing the mounting of image and sound in representative historical films; considering and handling authorial theory; presenting one's own work;  how to arrive at ideas, conception and practical implementation of first-year project with practical and contentual support and supervision (individual and group tutorial);  taking part in the first-year projects of fellow students.</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Understanding how to construct a film by mounting image and sound material</li> <li>- Acquiring the ability to analyse one's own fascination with a story</li> <li>- An introduction to techniques for evolving ideas</li> <li>- Refining one's own artistic approach</li> <li>- Acquiring basic knowledge of how to write an exposé, camera use and mounting</li> <li>- Acquiring differentiated dramaturgical and artistic terminology and using it to present and discuss filmic works (one's own and those of others)</li> </ul>
Entry requirements/useful and desirable qualifications: passing the entrance examination at the beginning of the module
Assessment: Specialist discussion in the final individual tutorial
Workload per semester: 360 hours of which Taught hours: 30 hours Independent study (incl. assessment): 330 hours
Credits: 12
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 1st and 2nd semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Film
<b>Title of module: Film/the moving image 3rd/4th semester</b> (multimedia and production)
This module consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Instruction in media concepts</li> <li>- Instruction in techniques and methods in a variety of media</li> <li>- Exploring personal media contexts</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Developing one's own vision of the medium</li> <li>- Developing an awareness of artistic issues, a methodical approach and new experimental ways of working</li> <li>- Gaining basic knowledge of techniques and methods in a variety of media</li> <li>- Gaining basic knowledge of cultural and social backgrounds</li> <li>- Critical analysis</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
Workload per semester: 420 hours of which Taught hours: 15 hours Independent study (incl. assessment): 405 hours
Credits: 14
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 3rd and 4th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Film
<b>Title of module: Film/the moving image 5th/6th semester</b> (multimedia and production)
This module consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Translating concepts into artistic activity</li> <li>- Approaches which cross the boundaries between media, and a multimedia approach in practice (in reference to film, speech, music and literature)</li> <li>- Constructing and presenting social and artistic realities</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Mastering and gaining an advanced knowledge of techniques and methods of media/cinematic production</li> <li>- Finding one's own ways to combine intellectual and theoretical aspects of this subject</li> <li>- Gaining advanced skills in using the practical techniques of production and filming</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
Workload per semester: 420 hours of which Taught hours: 15 hours Independent study (incl. assessment): 405 hours
Credits: 14
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 5th and 6th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Film
<b>Title of module: Film/the moving image 7th semester</b> (multimedia and production)
This module consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Extending artistic creation to a variety of public spaces (the cinema, galleries, publications and other venues)</li> <li>- Searching for possible artistic and media continuities, i. e., expanding personal critical experience</li> <li>- Methods of combining different media as a means of acquiring multimedia skills</li> </ul> <p><b>Learning aims:</b> Independently transmitting and arguing for one's own artistic position</p>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
Workload per semester: 420 hours of which Taught hours: 15 hours Independent study (incl. assessment): 405 hours
Credits: 14
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: 7th semester

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Film
<b>Title of module: Film/the moving image 8th semester</b> (multimedia and production)
This module consists of: individual tutorial
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- Searching for possible artistic and media continuities, i. e., expanding personal critical experience Methods of combining different media as a means of acquiring multimedia skills</li> <li>- Extending artistic creation to a variety of public spaces (the cinema, galleries, publications and other venues)</li> </ul> <p><b>Learning aims:</b> Independently transmitting and arguing for one's own artistic position</p>
Entry requirements/useful and desirable qualifications: none
Assessment: Specialist discussion in the final individual tutorial
Workload per semester: 120 hours of which Taught hours: 15 hours Independent study (incl. assessment): 105 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: 8th semester

## 4.5 Graphic Art/Photography

The Bachelor's degree course seeks to support students in developing an original visual language through artistically productive engagement with all forms of analogue and digital graphics and photography. It focuses on the development of an experimental openness for the interdependence between texts, image, film and objects in analogue and digital space and which is characteristic for the department.

In their choice and combination of media forms, processes and representations, students are encouraged to question and push the boundaries of their medium. For example, they are encouraged to produce compositions in which graphic or photographic elements appear alongside other media in installations, prints, projections or digital spaces. Learning on the degree course is structured by students' completion of an artistic development project, in which they work independently or in groups to develop their individual artistic vision through the interplay of practical and conceptual work and relate it to current artistic positions.

The course supports students in reflecting on their artistic vision. By entering into a discourse with a wide range of cultural contexts, they are encouraged to contribute to cultural development. The wide range of international cooperation programmes and exchange formats maintained by the HFBK provide our students with opportunities for intercultural encounters and a change of perspective. The fundamentally interdisciplinary nature of the degree courses taught at the HFBK enables our students to engage with related artistic and academic disciplines.

Students are encouraged to take advantage of the considerable academic freedom extended to them to make use of the well-equipped HFBK workshop facilities. Here, they can gather valuable experience in various fields, such as reprographic technology, printing technology and interface or web design. Supplementary courses enable students to explore a range of issues of art theory, history and method. Relating this to their own experience, students are able to develop their artistic approach and historical understanding.

In addition to providing an opportunity to produce artistic works, the course enables students to develop communication and discussion skills tailored to the institutional and social context of the art sector. The annual HFBK exhibition, its in-house gallery, material publishing house and a wide range of partnerships with institutions, civil society actors and digital networks offer the opportunity to test and discuss issues of image/art presentation and reception. Workshops and guest lectures involving international artists, academics and other universities ensure that HFBK students remain at the heart of the international artistic discourse

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Graphic Art/Photography (also open to students of other departments)
<b>Title of module: An introduction to artistic work in graphic art/photography</b>
This module consists of: individual and group tutorials
<p><b>Content of module:</b> An introduction to the process of creating art: experimental and project-related work</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Gaining basic practical experience and skills</li> <li>- Gaining of knowledge of artistic - communicative processes</li> <li>- Developing and refining one's own artistic ideas</li> </ul>
Entry requirements/useful and desirable qualifications: passing the entrance examination at the beginning of the module
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 360 hours of which Taught hours: 30 hours Independent study (incl. assessment): 330 hours</p>

## 4.6 Painting/Drawing

The Bachelor's degree course taught in the Department of Painting/Drawing gives its students the opportunity to establish an independent artistic vision and develop the skills of historical-critical reflection on a range of theoretical and practical issues concerning painting and drawing of the past, present and future.

Together, students are introduced to the fundamental technical, genre-specific, aesthetic and theoretical concepts of painting and drawing, which they explore through the realization of their own ideas and concepts. Students work with a range of forms, colours and surface designs and their wide ranging variations and combinations. They are also required to engage with contemporary art theoretical discourses, a wide range of historical and contemporary visual languages and issues of sustainability. They also learn to situate their own artistic articulations and those of others in the specific socio-cultural context of their development.

Students' learning and research is structured by the completion of their artistic development project, in which students work individually or as part of a group to develop a unique artistic vision through the interplay of practical and conceptual work. Students are introduced to painting and drawing techniques, printmaking (etching, lithography, screen printing, etc.) and digital image processing and development in special classes and practical courses.

The interdisciplinary nature of the degree course provides students with the opportunity to engage with related disciplines, thereby situating their artistic endeavours within this broader methodological framework.

The HFBK encourages and enables its students to spend part of their studies at a partner university abroad. Students participate in projects conducted with museums, galleries and the HFBK gallery and annual exhibition to develop skills in the presentation, communication and discussion of artistic works.

Supplementary courses taught in the Department of Theory and History enable students to explore a range of issues in art theory, history and method in further depth. Relating this to their own artistic vision and experience, students are able to establish their artistic approach and historical understanding.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Painting and Drawing (also open to students of other departments)
<b>Title of module: An introduction to artistic work in painting/drawing</b>
This module consists of: individual and group tutorials
<p><b>Content of module:</b> An introduction to the process of creating art</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Developing and refining one's own artistic ideas</li> <li>- Gaining basic practical experience and skills</li> <li>- Acquiring a knowledge of artistic concepts</li> </ul>
Entry requirements/useful and desirable qualifications: passing the entrance examination at the beginning of the module
Assessment: Specialist discussion in the final individual tutorial
<p>Workload per semester: 360 hours of which Taught hours: 30 hours Independent study (incl. assessment): 330 hours</p>
Credits: 12
Duration: 1 semester

Workload per semester: 120 hours of which Taught hours: 15 hours Independent study (incl. assessment): 105 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: 8th semester

#### **4.7 Time-based Media**

The Bachelor's degree course taught in the Department of Time-Based Media develops artistic dramaturgies and specific practices for (inter-) media formation processes in all spatio-temporal dimensions. Focusing on the full range of contemporary digital media, internet art, virtual reality, sound, photography and film, and their nuanced circulatory worlds and installative or performative settings, the course stresses their interplay with traditional forms of artistic expression.

The degree course seeks to encourage the individual or collective development of artistic articulations, including its students' ability to reflect on and to situate their work in the specific socio-cultural context of its development. Beginning with their identity as students at a Hamburg art academy, HFBK students go on to explore a range of diverse forms of artistic practice and positioning. This is accompanied by engagement with multiple contemporary and historical discourses of art theory, media criticism, diversity and sustainability.

Learning and research on the degree course is structured by our students' completion of an artistic development project in which they develop their individual artistic vision through the interplay of practical and conceptual work. Students acquire and practice the analogue and digital technical skills requisite to their degree course in practical courses taught in the HFBK media technology and electronics workshop, the acoustics laboratory, the mixed media workshop, a range of computer laboratories and the digital / material workshop. This enables them to explore the possible techniques of design and composition, form, surface and space, virtuality and concretion, sound and tone, image and detail, object and environment, time and duration and integrate them in their individual conception. The interdisciplinary nature of the degree course provides students with the opportunity to engage with related disciplines, thereby locating their own artistic endeavours within a broader framework.

Supplementary courses in art history and theory enable students to gather experience and explore a range of issues in their chosen field in greater depth.

The HFBK also maintains a number of international exchange programmes and project cooperation agreements with various institutions throughout the world, which afford our students the opportunity to refine the insights gained into their chosen discipline by engaging with other cultural contexts. We place great importance on the involvement of various publics in artistic research at the HFBK and the communication and discussion of art in the context of the diverse institutional and societal contexts of its presentation. Students are accorded the opportunity to present and discuss their work in the HFBK gallery and annual exhibition, in projects conducted with external partners and various workshops and events.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Time-based Media (also open to students of other departments)
<b>Title of module: An introduction to artistic work in time-based media</b>
This module consists of: individual and group tutorials
<p><b>Content of module:</b> An introduction to creating art in practice</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Developing and refining one's own artistic ideas</li> <li>- Gaining fundamental practical artistic skills and experience</li> <li>- Gaining an understanding of a variety of artistic concepts</li> </ul>

Frequency with which course offered: every semester
This module takes place: 8th semester

## 4.8 Theory and History

The Bachelor's degree course taught in the Department of Theory and History addresses a range of issues drawn from art and cultural studies, art education, design history and theory, art history, art theories, aesthetic and curatorial theory, philosophy and media theory. It also addresses selected aspects of gender theory, post-colonial studies, commemoration studies and other relevant discourses such as perspectives on sustainability in various fields of art, culture and their institutions. Taking an interdisciplinary approach to questions raised at the intersection of art and academia, it is studied in conjunction with an artistic subject.

Depending on the chosen weighting of theoretical and historical studies within their degree course, within four years, the students of the course acquire:

- In-depth knowledge of historical and contemporary artistic practice and the theoretical discourses in the specified disciplines.
- The ability to relate different theoretical approaches to each other, to make them productive in an interdisciplinary manner and working independently, to develop their own, possibly new questions.
- The ability to make an independent contribution (in the form of a text, publication or project) to an art or culture theoretical discourse, thereby laying the foundation for a career in a profession related to art and art theory.

The degree course has a modular structure. The individual components of the course are heterogeneous in terms of content and yet interrelated, allowing them to be combined in a range of fashions so as to enable students to develop their own distinctive approach. This acts as the starting point for the central focus of the degree course on the conception, presentation and publication of theoretical works in a range of professional contexts such as the exhibition industry, cultural institutions, journalism and the media.

In seminars, interdisciplinary projects, publications and in collaboration with non-university institutions, students learn to take a collective approach to academic questions. The HFBK prioritizes international exchange with a range of partner universities and through participation in international academic projects.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Theory and History
<b>Title of module: Theories of aesthetics 1st to 4th semester</b>
This module consists of: seminar, lecture
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- aesthetics as the theory of art, from literature and painting to photography and film</li> <li>- aesthetics as the theory of beauty, with its development from antiquity to the present day</li> <li>- Aesthetics as esthesis, as „the science of sensory perception“, as it is understood in the present day, with its different aspects and different stages of development through history, as listed in the reference book „ Ästhetische Grundbegriffe“ (“Dictionary of Aesthetic Terms”).</li> <li>- aesthetic theories in relation to philosophy, art theory, politics and ethics</li> <li>- the aesthetics of different cultures and geopolitical areas</li> <li>- aesthetics in relation to ethnic and gender studies</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- To gain an overview of different aesthetic theories</li> <li>- To gain an insight into both the historical development and the variety of different fields and theories of aesthetics</li> <li>- To advance independently in understanding of aesthetic theories and to demonstrate this in a presentation to the class</li> <li>- To develop the ability to apply theory to artistic creation, and to discuss artistic creation in relation to theory</li> </ul>
Entry requirements/useful or desirable qualifications: none
Assessment: oral presentation with written assignment, written assignment
Workload per semester: 240 hours of which Taught hours: 33,75 hours Independent study (incl. assessment): 206,25 hours
Credits: 8
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 1st to 4th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Theory/History
<b>Title of module: Theories of aesthetics 5th/6th semester</b>
This module consists of: seminar
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- aesthetics as the theory of art, from literature and painting to photography and film</li> <li>- aesthetics as the theory of beauty, with its development from antiquity to the present day</li> <li>- Aesthetics as aisthesis, as „the science of sensory perception“, as it is understood in the present day, with its different aspects and different stages of development through history, as listed in the reference book „ Ästhetische Grundbegriffe“ (“Dictionary of Aesthetic Terms”).</li> <li>- aesthetic theories in relation to philosophy, art theory, politics and ethics</li> <li>- the aesthetics of different cultures and geopolitical areas</li> <li>- aesthetics in relation to ethnic and gender studies</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- To engage with fundamental issues of aesthetic theory, and to acquire a deeper knowledge of its different aspects and of its development through history</li> <li>- To engage with aesthetic discourse in a critical way and to represent selected areas of theory appropriately in a presentation and in written work</li> <li>- To be able to discuss one’s own and others’ artwork with reference to appropriate aesthetic theories</li> </ul>
Entry requirements/useful or desirable qualifications: none
Assessment: oral presentation with written assignment, written assignment
Workload per semester: 240 hours of which Taught hours: 33,75 hours Independent study (incl. assessment): 206,25 hours
Credits: 8
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 5th and 6th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Theory/history
<b>Title of module: Theories of aesthetics 7th/8th semester</b>
This module consists of: seminar, colloquium
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- aesthetics as the theory of art, from literature and painting to photography and film</li> <li>- aesthetics as the theory of beauty, with its development from antiquity to the present day</li> <li>- Aesthetics as aisthesis, as „the science of sensory perception“, as it is understood in the present day, with its different aspects and different stages of development through history, as listed in the reference book „Ästhetische Grundbegriffe“ (“Dictionary of Aesthetic Terms”).</li> <li>- aesthetic theories in relation to philosophy, art theory, politics and ethics</li> <li>- the aesthetics of different cultures and geopolitical areas</li> <li>- aesthetics in relation to ethnic and gender studies</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- To acquire a deeper knowledge of aesthetic theory in its different aspects and its development through history</li> <li>- To analyse aesthetic discourse and compare critical representations of it in a presentation and in written work</li> <li>- to produce artistic works which reflect these concepts, and to discuss them with reference to an informed choice of theoretical doctrines</li> <li>- To be able to formulate an individual statement of theory with reference to other contemporary artworks and to be able to discuss the motivating force of contemporary art in an original way</li> <li>- To publish an original piece of work on theory (in the 8th semester)</li> </ul>
Entry requirements/useful or desirable qualifications: none
Assessment: oral presentation with written assignment, written assignment
Workload per semester: 240 hours of which Taught hours: 33,75 hours Independent study (incl. assessment): 206,25 hours
Credits: 8
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 7th and 8th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Theory/History
<b>Title of module: Theory and History of Design 1st/2nd semester</b>
This module consists of: lecture, seminar, exercise, project, excursion
<p><b>Content of module:</b></p> <p>The relationship between attitudes to design and conceptual/social history is explored and the potential and limitations of design praxis (in the widest sense, understood to include art and architecture praxis) are investigated.</p>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>• Acquiring an overview that provides a thorough grounding in design's development in the context of conceptual/social history</li> <li>• Acquiring a knowledge of the historical basis for a wider understanding of design</li> <li>• Developing the ability to analyse and to evaluate historical developments in design</li> </ul>
Entry requirements/useful or desirable qualifications: none
Assessment: final exercises, oral presentation with written assignment
<p>Workload per semester: 240 hours  of which  Taught hours: 33,75 hours  Independent study (incl. assessment): 206,25 hours</p>
Credits: 8
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 1st and 2nd semesters

Degree: Bachelor of Fine Arts (B.F.A.)
Department: Theory/History
<b>Title of module: Theory and History of Design 3rd/4th/8th semester</b>
This module consists of: lecture, seminar, exercise, project, excursion
<p><b>Content of module:</b>          Receiving and analysing contemporary design and contemporary trends in design theory and criticising them in context. Discussions will involve critically considering design in the context of social issues.</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>• Reading, reception, argumentation and discussion skills</li> <li>• Acquiring a knowledge of the theoretical basis for a wider understanding of design</li> <li>• Acquiring the ability to develop communication strategies</li> </ul>
Entry requirements/useful or desirable qualifications: none
Assessment: oral presentation with written assignment, written assignment
Workload per semester: 240 hours of which Taught hours: 33,75 hours Independent study (incl. assessment): 206,25 hours
Credits: 8
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 3rd/4th/8th semesters

Degree: Bachelor of Fine Arts (B.F.A.)
Department: Theory/History
<b>Title of module: Theory and History of Design 5th/6th/7th semester</b>
This module consists of: lecture, seminar, exercise, project, excursion
<p><b>Content of module:</b></p> <p>Based on current social issues and questions, students will acquire an understanding of design as a factor of social change. Students will discuss and analyse contemporary and historical approaches to design, art, architecture and other related fields, and, based on this, will develop their own views on design theory.</p>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>• Becoming competent in scientific methodology</li> <li>• Developing the ability to observe, to analyse and to assess contemporary international developments in design</li> <li>• Developing the ability to independently express design theory questions and to examine them scientifically</li> </ul>
Entry requirements/useful or desirable qualifications: none
Assessment: oral presentation with written assignment, written assignment
<p>Workload per semester: 240 hours  of which  Taught hours: 33,75 hours  Independent study (incl. assessment): 206,25 hours</p>
Credits: 8
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 5th/6th/7th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Theory/History
<b>Title of module: Art and cultural sciences with gender studies 1st to 4th semester</b>
This module consists of: seminar, exercises, an excursion
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- The different media of art and the connections between them seen from an academic or historical perspective (with an emphasis on conceptual art, art installations, video and audio in art, film, performance art, how a specific place can be part of an artwork's impact, participation, photography, painting, sculpture)</li> <li>- artistic research</li> <li>- The production and reception of art on a national and international scale (taking a critical look at critical examination and analysis of both exhibitions of an individual artist's work and exhibitions organised around a particular theme, as well as the contents of galleries and art collections and events such as the Biennale and documenta)</li> <li>- Looking at visual and cultural studies through the lens of the poststructural, deconstructionist and psychoanalytic theory of <i>difference</i>, in a way which is rooted in image theory, the theory of perception and the theory of the performative</li> <li>- The principles of organisation and structure, or mental categories, which govern <i>gender</i> in art and in art and cultural studies</li> <li>- The concepts of subjectivity and authorship, and calling them into question. This includes the theories of intersubjectivity</li> <li>- Connections between the fields of art, science and physical nature, society, culture, economy and politics, and the ways in which they influence each other</li> <li>- The relationship between theory and practice</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Becoming familiar with issues involving the connections between a chronological view of art development and a scientific/ theoretically organised view of art. Becoming experienced in interdisciplinary ways of working</li> <li>- Recognising the reciprocal relationship between art and other areas, in particular the history of culture, society, sciences and technologies and the history of changing attitudes</li> <li>- An introduction to the varied discipline of contemporary art. Systematically acquiring basic knowledge about artists and art movements since 1800.</li> <li>- Gaining a basic knowledge of the history of art and of different artistic media, through the lens of art and cultural studies.</li> <li>- Seeing abstract scientific principles in relation to one's own artistic work for the first time</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: oral presentation with written assignment, written assignment, final exercises
Workload per semester: 240 hours of which Taught hours: 33,75 hours Independent study (incl. assessment): 206,25 hours
Credits: 8
Duration: 1 semester

This module consists of: seminar, exercises, an excursion, colloquium
<p><b>Content of module:</b></p> <ul style="list-style-type: none"> <li>- The different media of art and the connections between them seen from an academic or a historical perspective (with an emphasis on conceptual art, art installations, video and audio in art, film, performance art, how a specific place can be part of an artwork's impact, participation, photography, painting, sculpture)</li> <li>- artistic research</li> <li>- The production and reception of art on a national and international scale (taking a critical look at both exhibitions of an individual artist's work and exhibitions organised around a particular theme, as well as the contents of galleries and art collections and events such as the Biennale and documenta)</li> <li>- Looking at visual and cultural studies through the lens of the poststructural, deconstructionist and psychoanalytic theory of <i>difference</i>, in a way which is rooted in image theory, the theory of perception and the theory of the performative</li> <li>- The principles of organisation and structure, or mental categories, which govern <i>gender</i> in art and in art and cultural studies</li> <li>- The concepts of subjectivity and authorship, and calling them into question. This includes the theory of intersubjectivity</li> <li>- Connections between the fields of art, science and physical nature, society, culture, economy and politics, and the ways in which they influence each other</li> <li>- The relationship between theory and practice</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Gaining a deeper knowledge of art and cultural issues, along with the ability to work with the science of theory in an independent and analytical way</li> <li>- Finding a clearly demarcated position for one's own artwork in the context of current art discourse</li> <li>- To encourage students to research the science of aesthetics independently and to analyse critically, and to produce the first groundwork and planning for a theoretical and practical BA paper</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: oral presentation with written assignment, written assignment
Workload per semester: 240 hours of which Taught hours: 33,75 hours Independent study (incl. assessment): 206,25 hours
Credits: 8
Duration: 1 semester
Frequency with which course offered: every semester
This module takes place: during the 7th and 8th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Theory/History
<b>Module title: The history of art 1st to 4th semester</b>
This module consists of: lecture, seminar, colloquium, studies based on original artwork, an excursion
<p><b>Content of module:</b></p> <p>The module Art History includes the history of both visual art and visual media and is aimed at giving students a well-founded basic grasp of the history and theory of the different forms and applications of artistic and other varieties of visual image-making from the early Middle Ages to the present day. It includes the traditional study areas of architecture, sculpture and other 3-dimensional art, painting and other graphic art, art in craft and design as well as its other more recent manifestations (mixed media, installation and performance art), alongside the newer technology-dependent image-making media, such as photography, film, video and media involving the internet.) In addition, we will be looking during this module at the history of the main kinds of institution which have shaped and made possible both visual art and visual imagery in popular culture, and their basic features (studios, academies of art, galleries, museums, exhibitions, the art market etc).</p> <p><b>Learning aims:</b></p> <p>To gain a general knowledge of both historical and contemporary areas of the history of visual art, images and visual media. This includes knowledge of different areas of theoretical debate, along with the institutions associated with them, scientific and critical examination of artwork in the past, past states of world art and past occurrences in world art and the systems regulating art, and using this knowledge to compare art in the past to art in the present day (and seeing one's own artistic work in relation to art movements in the past.).It also includes learning an approach to an object of analysis appropriate to the subject of Art History, and learning to analytically describe both historical and contemporary works of visual art and examples of the visual in popular culture. This also involves gaining a general overview of and a competence in dealing with the areas of study named above. Also, competence in determining the nature of, describing and analysing examples of visual culture with reference to form, function and content, and being introduced to basic scientific working principles and how to learn, as well as the basics of independent and critical thought, which will be learned through giving presentations, contributing to discussions, writing protocols and completing written coursework.</p>
Entry requirements/useful and desirable qualifications: none
Assessment: oral presentation with written assignment, written assignment, final exercises

## **Foundation courses**

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of foundation course: Basics of sculpture</b>
This course consists of: seminar, exercise, a practical project
<p><b>Content:</b> This module will deal with the discovery and development of sculptural forms of expression</p> <p><b>Learning aims:</b> Gaining experience concerning materials and forms (e. g. haptic qualities and the rendering of everyday phenomena in sculpture)</p>
Entry requirements/useful and desirable qualifications: none
Assessment: Students present a piece of artistic work to a group (final group tutorial)
Workload per semester: 120 hours of which Taught hours: 30 hours Independent study (incl. assessment): 90 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of foundation course: Basics of stage design</b>
This course consists of: seminar, exercise, a practical project
<p><b>Content:</b> This module will deal with the discovery and development of aesthetic forms in space</p>
<p><b>Learning aims:</b> Gaining experience in the conceiving of spaces, (e. g. the perception of spatial constructions and an awareness of the nature of theatrical space)</p>
Entry requirements/useful and desirable qualifications: none
Assessment: Students present a piece of artistic work to a group (final group tutorial)
<p>Workload per semester: 120 hours of which Taught hours: 30 hours Independent study (incl. assessment): 90 hours</p>
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of foundation course: Basics of design</b>
This course consists of: seminar, exercise, a practical project
<p><b>Content:</b> Project-related work corresponding to specific assignments</p>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Mastering a variety of themes related to the subject through competent research and through a personal perspective</li> <li>- Gaining the ability to approach specific assignments creatively and to carry them out with a view to producing innovative work</li> <li>- Acquiring a method of working both on a given assignment and with artistic freedom. This working method will be divided into stages (analysing the task given, coming up with ideas, representing the design in 2 or 3 dimensions, and final presentation of the design)</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Students present a piece of artistic work to a group (final group tutorial)
Workload per semester: 120 hours of which Taught hours: 30 hours Independent study (incl. assessment): 90 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of foundation course: Basics of film</b>
This course consists of: seminar, exercise, a practical project
<p><b>Content:</b></p> <p>Investigation of the relationship between sound and image in film; an introduction to filmic narrative and its basic concepts; discussion and exploration of the possibilities of film mounting; exercises to deepen one's own artistic work.</p>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Contentual and practical knowledge of the relationship between sound and image in film</li> <li>- Acquiring the capacity to analyse the mounting of films</li> <li>- Acquiring basic knowledge of the artistic treatment of films</li> <li>- Knowledge of authorial film theory</li> <li>- Gaining practical knowledge by working on one's own exercises (the evolving of ideas, narrative standpoints and small-scale exercises in the relationship between sound and image in film)</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Students present a piece of artistic work to a group (final group tutorial)
<p>Workload per semester: 120 hours  of which  Taught hours: 30 hours  Independent study (incl. assessment): 90 hours</p>
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of foundation course: Basics of graphic art/photography</b>
This course consists of: seminar, exercise, a practical project
<p><b>Content:</b> Images and text as a foundation for artistic and communicative expression</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Developing one's own artistic perspective on photography as a medium</li> <li>- Developing an awareness of the different ways one can use graphic techniques to create art and design</li> <li>- Using everyday phenomena in one's own work</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Students present a piece of artistic work to a group (final group tutorial)
Workload per semester: 120 hours of which Taught hours: 30 hours Independent study (incl. assessment): 90 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of foundation course: Basics of painting/drawing</b>
This course consists of: seminar, exercise, a practical project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- The basics of colour as a phenomenon (the systematics of colour and colour perception)</li> <li>- The basics of the image as a phenomenon (the image as an art form and the image as a representation medium)</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Understanding and mastering the effects created by colour</li> <li>- Understanding and mastering the properties and potential of images and sculpture</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Students present a piece of artistic work to a group (final group tutorial)
Workload per semester: 120 hours of which Taught hours: 30 hours Independent study (incl. assessment): 90 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of foundation course: Basics of time-based media</b>
This course consists of: seminar, exercise, a practical project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- The basics of „time“ as a phenomenon</li> <li>- The basics of translating content into the media</li> </ul>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Learning how to work with time-related phenomena</li> <li>- Understanding and applying the possibilities for creating art contained in time-related media</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Students present a piece of artistic work to a group (final group tutorial)
<p>Workload per semester: 120 hours  of which  Taught hours: 30 hours  Independent study (incl. assessment): 90 hours</p>
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

## **Group tutorials**

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>This course consists of: Group tutorial for Concept Design</b>
<p><b>Content:</b></p> <p>Students will be able to discuss their artistic work in a group context. This will enable them to develop presentation skills and learn how to engage with and transmit the subject matter. In addition, this will enable them to define their own artistic work in relation to the context of other art. They may also take part in collaborative group projects.</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Formulating a personal approach to artistic issues which is appropriate to personal motivation and individual study aims</li> <li>- Comparing one's own artistic position with others, with regard to formal and thematic individuality</li> <li>- This class will enable students to focus on their own individual choice of medium, with a view to developing an interdisciplinary understanding of art</li> <li>- Developing a critical appreciation of one's own and other's artwork. Discussion and evaluation as a basis for developing further artwork</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Students present a piece of artistic work to a group (final group tutorial)
Workload per semester: 120 hours of which Taught hours: 15 hours Independent study (incl. assessment): 105 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 3rd to 8th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>This class consists of: Group tutorial for Digital Graphics</b>
<p><b>Content:</b></p> <p>Students will be able to discuss their artistic work in a group context. This will enable them to develop presentation skills and learn how to engage with and transmit the subject matter. Discussion and evaluation as a basis for developing further artwork</li> </ul>
Entry requirements/useful and desirable qualifications: none
Assessment: Students present a piece of artistic work to a group (final group tutorial)
<p>Workload per semester: 120 hours  of which  Taught hours: 15 hours  Independent study (incl. assessment): 105 hours</p>
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 3rd to 8th semesters

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>This course consists of: Group tutorial for Mixed Media</b>
<p><b>Content:</b></p> <p>Students will be able to discuss their artistic work in a group context. This will enable them to develop presentation skills and learn how to engage with and transmit the subject matter. In addition, this will enable them to define their own artistic work in relation to the context of other art. They may also take part in collaborative group projects.</p>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Formulating a personal approach to artistic issues which is appropriate to personal motivation and individual study aims</li> <li>- Comparing one's own artistic position with others, with regard to formal and thematic individuality</li> <li>- This course will enable students to focus on their own individual choice of medium, with a view to developing an interdisciplinary understanding of art</li> <li>- Developing a critical appreciation of one's own and other's artwork. Discussion and evaluation as a basis for developing further artwork</li> </ul>
Entry requirements/useful and desirable qualifications: none

## **Practical courses**

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Audiolab</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- An introduction to the HfbK Hamburg's audiolab equipment</li> <li>- The principles of analogue and digital electro-acoustic production</li> <li>- Working with microphones, signal paths, midi and the mixing desk</li> <li>- The theory and technique of analogue and digital audio production</li> <li>- Introduction to diverse digital audio production programmes, audio post-production, digital editing and mounting</li> <li>- Working with audio in combination with other media such as video, film, audio recording media and the internet</li> <li>- Contentual and technical support for individual artistic projects</li> <li>- Presenting audio/performance art/installation art/video/internet projects</li> <li>- Introduction to the basic issues concerning space, hearing, voice, sounds, audio properties, noise in sound art, music theory and media history</li> </ul> <p><b>Learning aims:</b></p> <p>The introductory courses teach basic knowledge of electro-acoustic processes and their applications. The aim is the development and realisation of independent artistic audio concepts and sound projects incorporating specific sound technology processes and to reflect on them contentually and aesthetically.</p>
Entry requirements/useful and desirable previous qualifications: none
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: CAD/3D</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <p><u>PC basics:</u> General introduction to working on a PC (hardware, operating systems, printing, scanning, data security, recording onto CDs and DVDs, video projection, networks, the Internet, and features specific to higher study)</p> <p><u>Vector-oriented drawing</u> Instruction in techniques of vector-oriented drawing (basic methods, drawing tools, layout, levels, printing, importing and exporting)</p> <p><u>Pixel-based image manipulation</u> Instruction in pixel-based image manipulation techniques (basic methods, scanning and vectorising, retouching, image correction, photograph montage, non-destructive picture reworking, importing and exporting, printing)</p> <p><u>3D CAD</u> Instruction in NURBS (Non-uniform rational B-spline)-based 3D modelling (CAD) (Nurbs and GUI (Graphic User Interface)), high-precision modelling, modelling techniques, basic TZ (technical collaboration), basic rendering, „error-free“ work, layers and construction levels, finding and designing forms, tips and tricks, data transfer [CAD, vectors, using the Photoshop program)</p> <p><u>3D rendering</u> Instruction in rendering in 3D for use in planning and design (rendering techniques, light and shadow, properties of materials and surfaces, mapping, set construction, data transfer, simulation und animation if necessary.)</p> <p><b>Learning aims:</b> Students will be instructed in basic and in more advanced skills for use in the areas named above. They will have the opportunity to learn about the extensive possibilities offered by working on a PC und how to intelligently choose a means of tackling the work. They should also discover how to use of all the different programs in an integrated way to achieve an effective working process. This will allow students to develop their own knowledge and to independently find solutions to fundamental problems.</p>
Entry requirements/useful and desirable qualifications: some knowledge of PCs, completion of a foundation course or another equivalent qualification (will be made known before beginning of course)
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Camera/Light/Sound</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- An understanding of basic techniques requisite to the realization of film and other audio-visual projects, in particular the production of audio and visual recordings.</li> <li>- An understanding of selected aspects of film theory</li> <li>- An understanding of the technical basics of camera, light and sound</li> <li>- Experimental development of independent working practices in image, light and sound design</li> </ul>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Development of an awareness of the range of approaches to the realization of artistic films and other audio-visual projects</li> <li>- Development of the ability to criticize the use of the moving image and sound in artistic work</li> <li>- The ability improvise with audio visual film content</li> <li>- The development of technical skills such as a basic knowledge of camera operation, lighting or audio recording</li> <li>- General skills in the organization and realization of film shooting</li> </ul>
Entry requirements/useful and desirable previous qualifications: none
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Ceramics</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <p>My area of interest is the sculptural forming of 3-dimensional ceramic masses, usually fixed by means of a heating process.</p> <p>In the workshop I offer introductory courses in the technology, iconography and practice of working with ceramic materials.</p> <p>Special attention is given to working in porcelain, and also in innovative ceramic materials.</p> <p>Workshops will allow students to gain a deeper knowledge of the history of ceramics as art, as well as ceramic technology and practice.</p>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- The supervised individual projects will be concerned with developing work as an integrated part of a consistent artistic concept, as well as an experimental approach to ceramic materials and production processes.</li> <li>- Learning different techniques: free modelling, pouring techniques, techniques involving rotational symmetry, forming using plaster.</li> <li>- Working with ceramic surfaces: experimenting with glazes, using various techniques of applying glazes, imprinting processes, modelling of ceramic surfaces.</li> </ul>
Entry requirements/useful and desirable previous qualifications: will be made known at the beginning of the semester
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Computery</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b> Teaching and developing fundamental skills and abilities in working with digital media and programs</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Becoming acquainted with computers and systems, and with digital media</li> <li>- Operating safely on the Internet</li> <li>- Practice in working with programs</li> </ul>
Entry requirements/useful and desirable previous qualifications: none
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Digital Editing/Film</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Analogue and digital post-production techniques – main topic film and video.</li> <li>- Looking at different media in different social contexts</li> <li>- Course should accompany and provide instruction in formulating and in answering questions arising from the creative work, and provide support appropriate to the context for practical work and research</li> <li>- Seminars will deal in detail with specific issues related to the practical creative project and to research.</li> <li>- Principles of filmmaking/editing in theory and practice with reference to concepts of filmmaking over the years and to current trends</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Acquiring basic skills and proficiencies in analogue and digital production and post production as used for film and video</li> <li>- To be able to independently produce audiovisual projects incorporating specific techniques in an appropriate way.</li> <li>- To explore the theory and practice of filmmaking/editing and in particular the role of the editor.</li> <li>- To assist the student in developing an individual artistic competence.</li> </ul>
Entry requirements/useful and desirable qualifications: will be made known at the beginning of semester
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Digital Typography and Graphics</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- techniques of digital typesetting and digital graphics</li> <li>- basics of working with digital typesetting programs</li> <li>- basics of vector graphics and its application</li> <li>- seminars expanding on specific problems posed by artistic/design project work and research</li> <li>- design principles, learned through extensive typesetting/layout projects involving preparation for a realisation/for printing</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- to become familiar with basic knowledge and skills in typography and digital typesetting</li> <li>- realisation of independent typography/typesetting/graphics projects, involving digital tools</li> <li>- to engage with the theory and practice of digital working processes and different digital approaches</li> <li>- this course should support the development of an individual creative "writing style"</li> </ul>
Entry requirements/useful or desirable qualifications: will be published at the beginning of each semester
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Digital/Material</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- An introduction to CAD and mesh-based file formats</li> <li>- Working with various 3D softwares – CAD modelling, sculpting and slicing</li> <li>- Operation of 3D printer, laser cutter and 3D scanner</li> <li>- Realization of artistic projects with the stated media</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Independent production of 3D objects on a PC</li> <li>- Preparation of 3D files for a 3D printer and laser cutter</li> <li>- Independent working with a 3D printer and laser cutter</li> <li>- From the artistic design to the object/product – determining the processes in comparison with the corresponding drafting systems (drawing/tech. drawing/CAD/3D model)</li> </ul>
Entry requirements/useful and desirable previous qualifications: none
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Media Technology and Electronics</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Teaching the basics of Media Technology and Electronics taking into account safety considerations.</li> <li>- The conception, planning and production of analogue and and/or digital circuits for use in interactive artistic objects, design objects and sound and film editing and sensors and their analysis.</li> <li>- The basics of electronic soldering and measuring technology</li> <li>- Teaching of cybernetics concepts and the interaction between art, technology and medial narration.</li> <li>- The basics of the generation, processing and recording of analogue and digital video and sound formats, both for live applications and post-production.</li> <li>- The basics of the production of interactive computer programmes.</li> <li>- The basics of the production of visual effects with 3D software for artistic working with images and animations.</li> <li>- Theoretical and practical supervision in the realization of projects; experimental work for extending understanding.</li> </ul> <p><b>Learning aims:</b></p> <p>Students attend courses and conduct experiments to develop a basic understanding of the variety of the subject area and which enable students to apply these techniques in their projects.</p>
Entry requirements/useful and desirable previous qualifications: Computer skills
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Film Production</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Basics of film promotion and film financing, film production and costing, financial accounting for graduation film projects, rights clearing.</li> <li>- Support for individual film projects in close association with seminars and tutors in the Film department.</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Implementing one's own film plans in study projects with crossovers between artistic disciplines and departments.</li> <li>- Gaining knowledge of film production and distribution in the tradition of the independent artistic author film.</li> </ul>
Entry requirements/useful and desirable previous qualifications: none
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Film Studio</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Preparation and setup for studio filming work, set and lighting design, green screen techniques, filming with analogue and digital camera technology, panning with dolly and crane equipment</li> <li>- Assistance with subject matter and technical support for individual film projects, in harmony with seminars in the department of Film</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Implementing personal film ideas within an artistic and interdisciplinary project study programme</li> </ul>
Entry requirements/useful and desirable qualifications: Registration at the beginning of the semester / An understanding of the medium of film is expected
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Final Cut</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Processes of digital film processing (project setup, digitalisation, film montage, compositing, colour correction, film export).</li> <li>- Assistance with subject matter and technical support for individual film projects, in harmony with seminars in the department of Film.</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Implementing personal film ideas within an artistic and interdisciplinary project study programme</li> </ul>
Entry requirements/useful and desirable qualifications: Registration at the beginning of the semester / An understanding of the medium of film is expected
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Fine Metalwork</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ol style="list-style-type: none"> <li>1. Basic skills in processing and handling different metal alloys with regard to the properties of different elements <ul style="list-style-type: none"> <li>- Machining using appropriate tools and machines (e. g. sawing, cutting, turning on the lathe, drilling and filing)</li> <li>- Chipless machining (e. g. bending, cutting, finishing of edges, raising, embossing, casting)</li> <li>- Connective techniques (e. g. various types of soldering and how to use them, spot-welding, riveting)</li> <li>- Shaping techniques (e. g. cutting using a CNC (Computerised Numerical Control) lathe, turning on a lathe, vacuum moulding, silicone die-casting, making of wax models)</li> <li>- Surface finishing techniques (e. g. matt finish, bead blasting, buffing, grinding, polishing)</li> </ul> </li> <li>2. Advisory and practical support in producing project work.</li> </ol>
<p><b>Learning aims:</b></p> <p>In the introductory course basic skills will be developed for dealing with materials with different properties and using different techniques. This knowledge is intended as the basis for the planning and realisation of independent projects related to the individual's course of study. Through contact with the tools and materials, the students should also learn to develop their own ways of utilising materials in planning and carrying out artistic projects.</p>
Entry requirements/useful and desirable previous qualifications: students must have successfully completed an introductory course or produce proof of previous qualifications in fine metalwork. The advanced course consists of a project supervised and carried out for the most part in the university metalwork lab.
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Library</b>
This course consists of: An introduction to academic working, especially literature and image research and literature and image referencing
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- An introduction to the library and its sections</li> <li>- An introduction to the HFBK library website. Examples of research using OPAC (Online Public Access Catalogue) and the databanks (Jstor, Art Source, Allgemeines Künstlerlexikon Online, Prometheus, ARTbibliographies Modern)</li> <li>- Support and assistance for student research in preparing for presentations and graduation work and in the contextualizing of their own artistic work</li> </ul> <p>An introduction to a critical and differentiated way of working with different text types Support in targeted use of image databanks, monographs and exhibition catalogues to reflect on and discuss one's own visual materials</p> <ul style="list-style-type: none"> <li>- Correct citation in text and notes, with illustrations based on examples and individual advice</li> <li>- Producing a bibliography, with illustrations based on examples and individual advice</li> </ul>
<p><b>Learning aims:</b></p> <p>Students will be enabled to independently research image material and literature corresponding to their themes and interests in library catalogues and databanks, and also to discuss them critically, including with reference to their own artistic position. Additionally, students will gain an understanding of how to correctly quote literature and systematically reference it in the notes and bibliography.</p>
Entry requirements/useful and desirable qualifications: none
Assessment: final exercise
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study Programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: Open to students of all departments
<b>Title of practical course: Library - Language and Performance</b>
The course consists of: Practical course, practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Artistic exploration of language as a practice that both creates and affects reality</li> <li>- Investigating the production, variation and effect of language as spoken word, body language and spatial language, rhythm and intonation, especially in interactions</li> <li>- Experimenting with language use and expression through (inter)action, body work, improvisation and other media</li> <li>- Learning and practising communication skills in relation to artistic projects and a variety of artistic terminology</li> <li>- Learning and practising language-related skills in relation to working with texts and media</li> </ul> <p>Learning aims: Students learn to use the medium of language in diverse and targeted ways and to position it within a reflected dialogue with other media. They experiment with situation-specific performances and can analyse and discuss these. They can describe their own and other artistic projects, ideas and positions using complex language and in dialogue with others.</p>
Entry requirements/useful or desirable qualifications: Where applicable, a specified level of language competency under the Common European Reference Framework (CERF)
Assessment: Regular participation, completion of artistic projects to the level required by the subject (demonstration pieces), final exercises
Workload in hours per semester: 120 (of which 64 contact hours)
Credits: 4
Length of course: 1 semester
The course runs per semester.
The course takes place: every semester.

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Metal</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Working metal by hand: working with sheet metal, shaping, machine-tooling</li> <li>- Working metal by machine: turning on the lathe, drilling, cutting</li> <li>- Techniques of joining in metal: hard soldering, various welding techniques, smithing</li> <li>- Experimenting to find solutions to technical and mechanical problems</li> <li>- Experimenting with different methods/processes of production</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Instruction in basic metalwork skills</li> <li>- Development of skills through a practical project</li> <li>- To develop a knowledge of the department including choice of materials, determining what measurements to work to, choice of tools/technology</li> <li>- The entire process from designing the artwork to making it– determining what process to use with reference to the appropriate drafting techniques (drawing/technical drawing/computer and 3-dimensional models)</li> </ul>
Entry requirements/useful and desirable previous qualifications: none
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Mixed Media</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Instruction in basic techniques related to „Multimedia“, in particular production and presentation of work related to installation art, audio, video and the Internet</li> <li>- Instruction in aspects of theory related specifically to multimedia theory</li> <li>- Instruction in the specific technical basics of multimedia art.</li> <li>- planning and carrying out of exhibition projects.</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- To acquire an awareness of the various possibilities available for the creation of multimedia artistic work</li> <li>- To gain judgement in the use of technology in art.</li> <li>- To develop the ability to improvise and to work in real time with multimedia content</li> <li>- To gain technical skills such as programming, and general principles of electrics and electronics</li> <li>- To gain general skills relating to the planning and carrying out of exhibition projects</li> </ul>
Entry requirements/useful and desirable previous qualifications: none
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Photo Studio</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b> Basic principles of lighting and studio techniques</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Basic knowledge of the possibilities and working processes in a photographic studio.</li> <li>- Learning skills for working with lighting and studio techniques.</li> <li>- Gaining the necessary experience to deploy different flash heads and light formers for specific projects (portrait photography – product photography staged photography)</li> <li>- Acquiring the necessary experience to appropriately use the different camera systems (analogue - digital / small format – medium format – large format).</li> <li>- Basic knowledge of how to further process of the obtained photographs and image materials.</li> <li>- Completing autonomous photographic projects.</li> <li>- Acquiring the basic requirements for documenting one’s own work (object photography for presentation purposes).</li> </ul>
Entry requirements/useful and desirable previous qualifications: taking part in an introductory course
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Photography analogue</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>• Basic principles of manual b/w film development</li> <li>• Basic principles of manual b/w enlargement</li> <li>• Basic principles of manual colour enlargement</li> </ul> <p><b>Learning aims:</b></p> <p>Basic knowledge of working processes and skills required for working with classical analogue photography laboratory techniques, covering relevant security issues. Developing a consciousness of intrinsic properties and of the artistic potential of analogue photography and dark chamber work, as opposed to digital photography and the techniques involved in digital development and enlargement processes. Knowledge of the possibilities and of the sensible use of fusions or combinations of digital and analogue photographic processes. Completing autonomous photographic projects, with appropriate use of analogue or hybrid photographic techniques.</p>
Entry requirements/useful or desirable qualifications: Participation in basic course. If students are already familiar with the content of the basic course, participation in a safety precautions instruction session is required
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Photography digital</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- digital image editing techniques (digitalising/image editing/image exposure in Color Management Workflow)</li> <li>- technical and department matter-related support for individual artistic projects</li> <li>- seminars about artistic, technical and historical aspects of photography in the area of Fine Art</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- To formulate an individual and independent artistic-photographic opinion in the area of Fine Art through theoretical conception and practical realisation</li> <li>- independent and well-considered work with digital image editing tools, using knowledge of and referencing artistic, technical and historical aspects of photography in the area of Fine Arts</li> </ul>
<p>Entry requirements/useful or desirable qualifications:</p> <ul style="list-style-type: none"> <li>- Basic knowledge of working with computers with the usual operating systems</li> <li>- Basic knowledge of working with analogue photographic techniques (camera/negative/positive)</li> </ul>
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Plaster</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Creative artistic work in plastic materials</li> <li>- Realisation of project with regard to form, proportion and surface</li> <li>- Learning and research will be supplemented by sessions of experimentation with materials, according to individual artistic intentions.</li> <li>- This course will aim to convey the principles and techniques of shaping 3-dimensional forms</li> <li>- Instruction in theory and practice will serve as preparation for independent work</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- To be able to formulate, systematise and define one's own artistic position</li> <li>- To understand the materials of 3-dimensional art, be able to handle them and know how to use them</li> <li>- To understand and confidently use all the means of expressing art in 3 dimensions</li> <li>- To recognise the nature and effects of the shaping technique used, and how to accentuate content and form</li> <li>- To make informed use of the relationship between an object and its space</li> <li>- To develop a consciousness of a sculpture's relationship to its context which takes into account the relationship between space and mass, and recognise how its location affects a sculpture's impact.</li> </ul>
Entry requirements/useful and desirable previous qualifications: none
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Plastic</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <p>Instruction in and use of:</p> <ul style="list-style-type: none"> <li>- Manual working of artificial substances: lamination, moulding, pouring and adhesion techniques</li> <li>- Machine working of artificial substances: sawing, drilling, turning on a lathe, CNC (Computerised Numerical Control) cutting, CNC foam cutting, thermoplastic shaping</li> </ul> <p>Students will receive training in these techniques through introductory courses in the workshop, seminars and supervised work on practical projects.</p> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- Acquiring a profound knowledge of how to create and refine work in artificial materials Sensible and effective application of this knowledge in execution of one's own project.</li> <li>- Independent and experimental work with the help of the learned techniques. Being able to apply these in new ways in order to create new processes.</li> </ul>
Entry requirements/useful and desirable previous qualifications: none
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Prepress Workshop Digital</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b>            Basic instruction in the pre-press process for different techniques of printing, e. g. relief printing, screen printing, offset printing and digital printing.            Pre-press processing of text, images and other data.            The pre-press processes used will mainly be digital; analogue may also be used.            Instruction will be given as necessary in advanced techniques for use in projects.</p> <p><b>Learning aims:</b>            Understanding printing and publishing as artistic media in themselves.            Course should provide a basis for reproducing artistic work using adequate printing techniques.            Skills will be further developed through projects and experimentation.</p>
Entry requirements/useful and desirable previous qualifications: Basic knowledge of computers (operating systems, programs in general)
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Printing Techniques</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <p><u>Work with analogue techniques</u>  Relief printing, e. g. wood and lino block printing, textile printing  Intaglio printing, e. g. etching, gravure printing  Flat screen printing, e. g. lithograph, offset printing</p> <p><u>Work with digital techniques</u>  Means of image productions, e. g. mouse, graphic tablet, camera, scanner, the computer and its programs  Computer printing, e. g. with ink-jet printer</p> <p><u>Work with mixed techniques</u>  Varied and mixed techniques such as using combinations of different printing techniques or digitalising analogue images to enable them to be manipulated before finally being produced in an analogue form</p> <p><b>Learning aims:</b>  In the taught course, basic knowledge of techniques will be gained along with a perception which should enable students to use different techniques intelligently  The purpose of the project is to make an artistic vision reality through knowledge of and experimentation with techniques</p>
Entry requirements/useful and desirable previous qualifications: none
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Silkscreen Printing</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <p><u>Screen printing on paper and textiles:</u></p> <ul style="list-style-type: none"> <li>- Instruction in basic skills for screen printing on different materials</li> <li>- advisory and practical support in producing project work</li> <li>- history of screen printing as a means of artistic production</li> </ul> <p><b>Learning aims:</b></p> <p>To gain experience of various qualities and techniques  This knowledge will provide the basis for the planning and carrying out of projects.  The aim is to develop individual artistic projects independently, incorporating specific techniques appropriate to the materials and department matter.</p>
Entry requirements/useful and desirable previous qualifications: Participation in a course is required for independent work with machines.
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Textiles</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Industrial and experimental weaving</li> <li>- Tuffing</li> <li>- Production of different textile surfaces using different techniques</li> <li>- The history of textile technology, and its application in art and industry</li> </ul>
<p><b>Learning aims:</b></p> <p>To gain experience of various qualities and techniques  This knowledge will provide the basis for the planning and carrying out of projects.  The aim is to develop individual artistic projects independently, incorporating specific techniques appropriate to the materials and department matter.</p>
Entry requirements/useful and desirable previous qualifications: Participation in a course is required for independent work with machines.
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of practical course: Wood</b>
This course consists of: practical instruction and practical work to accompany a project
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Training in basic principles of working in wood and wood-related materials, with regard to the properties specific to different materials.</li> <li>- Advisory and practical support in producing project work</li> <li>- Machining with the appropriate tools and machines, e. g. sawing, planing, cutting, grinding, with regard to the technical skills needed practical work</li> <li>- Chipless machining, e. g. warping, joining of sheet wood and other shapes by gluing</li> <li>- Plastic work, e. g. carving, cutting and turning.</li> <li>- Surface finishing, e. g. veneer, inlay or laminating</li> </ul> <p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- In the course of the practical work, students should get to know the various qualities of the materials and the techniques they make possible. This knowledge should form the basis for the planning and execution of projects.</li> <li>- Development of an individual working method for carrying out artistic projects</li> </ul>
<p>Entry requirements/useful and desirable previous qualifications:            The requirement for projects involving machine work is: having taken part in a foundation course or a vocational qualification as a carpenter or cabinet-maker</p>
Assessment: Artistic demonstration project (demonstration piece)
Workload per semester: 120 hours
Credits: 4
Duration: 1 semester
Frequency with which course offered: every semester
This course takes place: during the 1st to 8th semesters

**Note:** The workload indicated for workshops includes both taught hours and independent study components, as a differentiated calculation is not possible.

## Presentation of study work (for all departments)

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: all departments
<b>Module title: Presentation of study work</b>
This module consists of: examination
<p><b>Content:</b> This presentation of artistic work from the 1st and 2nd semesters takes place in front of an examination commission. If the presentation is passed, the commission members give recommendations for students' further study careers.</p> <p><b>Learning aims:</b> In this presentation of artistic work at the end of the 2nd semester, students must show that they can recognise, analyse critically and find appropriate solutions to artistic problems in the wider field of study.</p>
Entry requirements/useful and desirable qualifications: proof of having been awarded 28 credits during the 1 <sup>st</sup> and 2 <sup>nd</sup> semester in the Bachelor "Fine Arts" study programme
Assessment: presentation
Workload: 120 hours
Credits: 4
Frequency with which course offered: every year in the summer semester
This module takes place: at the end of the 2nd semester

## Final module

Study programme: Fine Arts; Degree: Bachelor of Fine Arts (B.F.A.)
Department: open to students of all departments
<b>Title of module: Final module</b>
This module consists of: Final examination
<p><b>Content:</b></p> <ul style="list-style-type: none"> <li>- Writing the Bachelor's thesis under the supervision of a professor</li> <li>- The student's final artistic project consists of works of art developed during the course of their studies or a work of art produced especially for the examination. It is to be presented within the scope of a public university colloquium.</li> </ul>
<p><b>Learning aims:</b></p> <ul style="list-style-type: none"> <li>- The Bachelor's thesis seeks to examine a candidate's ability to process a problem drawn from the department in which they study within a defined time constraint. Working under the supervision of a professor they are to develop and present their findings in an appropriate fashion.</li> <li>- The student is required to demonstrate a design ability, an ability for artistic reflection and manual artistic skills all developed over the course of their studies.</li> <li>- The colloquium will focus on the ability of the candidate to reflect on their artistic work.</li> </ul>
Participation requirements/useful and desirable qualifications: proof of 180 credits from the Fine Arts Bachelor's degree course
Examination: Bachelor's thesis and presentation with colloquium
Workload per semester: 540 hours of which Time for writing the Bachelor's thesis: 480 hours Presentation with colloquium: 105 hours
Credits: 18
Frequency with which course offered: every semester
This module takes place: 8th semester
